NRC Report #: 901857

## Action Information

Description: CONOCO-Phillips was contacted by DO; accrdng to NRC spill originated in EPA jrsdctn M. Brescio is rspndng to the scene. According to CONOCO a 12" flange on the internal piping system began leaking light-crude oil onto the ground ~0230/4/5/2009. The crude caught fire but was contained in 2nd Cntnmnt, firewater runoff ovrcm cntnmnt carrying unburnt oil and entered the Morses Cr. The spill is containd in the cr. and has not entered the Arthur Kill as of 0530. The OSRO is containing the spill, ICS/Unified Command" is activated. USEPA, USCG/Sect NY and AST & NJDEP are responding, Union Co. HAZMAT, Linden F.D. is on scene and keeping track of the oil movement; amt oil still unk. MFS 0730: Brescio on-scene reports fire is out; handled by CONOCO fire brigade and Linden Fire Dept. Amt oil lost unk; oil leaked to cr. estimated at 5-10bbls; oil limited to Morses Cr did not pass first weir. OSRO is cntng vac'g ops; all work to be cmplt'd 2day due to predctd hvy-rain events on mon. Leak was a hole in a pipe at a condensor and stopped; cause still unk, invstgtn pending. USCG rtnd to base; NJDEP was not on-scene. OSC will obs vac'g ops then rtn to stand-by status. MFS
